

WINd® Console Plus

WINd® Console Plus enables the virtualization of your testing. It is the command and control center that allows you to not only remotely control and monitor your handsets in the field, but also generate KPI reports.

Our award winning **LivePlots™** and **LiveProcessing™** features allow you to visualize your drive-test or walk-test by showing a live moving KPI breadcrumb trail that is traced in real-time as your test vehicle or walk-tester moves.

-  Monitor network with live streaming KPIs from UEs and scanner.
-  Remote Advanced Locking command to UEs - Technology, Band, EARFCN, PCI.
-  Remote command to start/stop test scenarios/scripts - VoLTE, HTTP, FTP, IPERF, YouTube, Mail, SMS, MMS
-  Remote command to control IBflex® scanner - initiate Bluetooth connectivity, set channels
-  Flag KPIs that breach a set threshold
-  Remote reboot and log-file fetch commands
-  Generate WINd® Automated Instant Report [Learn More](#)
-  Generate WINd® Interval KPI Report [Learn More](#)
